The GT3 is also the only 992 generation 911 that does not have a turbocharger; Its naturally aspirated flat-six makes 502 horsepower and 346 pounds-degs of torque. Yes, get in and out of them, but they are supportive as heck and feel appropriate in something as hardcore as a gt3.porsche has finally given its automotive infotainment system compatibility to 2022, although unlike Apple Carplay, it cannot be used wirelessly. (A lot of people hate it, but I don't - it works so well.) If I can nitpick for a moment, at the moment the shifter of the GT3 feels a bit, I don't know, hollow, as if it lacks the Metallic Facility you get in the Cayman GT4.Now by Porsche I've spent time on the standard GT3 and GT3 tour and have had the chance to drive the six-speed manual as well as the optional seven-speed PDK Dual-Clutch Automatic, I'm ready to make a decision. Eventually, my brain adapts and learns to rely on the Porsche prowess. Brush against the stratospheric 9,000 rpm Redline before you rise to the tingles-down-down your-spine rush endorphin. The GT3 has stood up toe with the best sports cars in the world - I'm talking about things like the \$330,000 Lamborghini Huracan Sto, \$212,000 Maserati MC20 and \$326,050 Mercedes-AMG GT Black Series. Did that stop you from wanting to drive this car all the time? Did I mention that the best tour package is free? Here's the crazy part, though: the low price is a kind of bargain. Enlarging the image blesses manual transmission. The GT3 is so adept at cutting race lanes, as it is making you feel like a hero on that same highway in your home. If I were buying the GT3 tour - and let's be honest, this is totally the way I would go - I would have the manual transmission. The steering is light and fast and the front rear tyres and 315/35 and 315/30 are almost impossible to release. If I buying the winged GT3, which is indisputably the 's more likely to see the duty of tracking, I'd get the PDK. But the man, wow, can't be as quick as unabated as this car can go around a corner. All this kindness comes to cost of driving comfort? But again, there's a GT3, so really, who cares? Enlarge image The carbon fiber seats of a floor are a must. It's visceral and superlative, and something you don't want to drive all the time. Driver assistance technology is also on super short offer, limited to optional recognition of the traffic signal and rear parking sensors. That gimmick front suspension has been adapted from the 911 RSR race car, and I've given it to the Utworlds of the GT3 while improving change and feedback compared to a more traditional MacPherson Strut setup. Even the GT3's smoothest chassis scene is quite hard, and this car hates paving and expansion joints. It changes faster than even the most qualified manual driver and is perfectly adjusted to accommodate the straw of the GT3. And this does it without looking unpleasant and really give you a place to put a suitcase. And when you're not giving hell, enjoy the 4.0 liter Porsche's Hum.Âe. Porsche Âe offers a Bose Audio update for \$1,600, but with a sweet soundtrack playing right behind your head, why bother a heavy clutch and short-term gearbox are highlights of the GT3 six-speed manual transmission, as well as the auto-matching feature Rev's theory that appears in Sport mode. The 2022 GT3 costs \$164,150 to start, which includes a \$1,350 target fee and a \$1,700 Guzzler tax. You will never forget that speed of collision down your street again.
